Find the beauty lying near about you, reproduce it, and send it along for others to admire. What a charming appeal to the care-free mind of young humanity. It may seem strange but it is indeed true that children are slow to see and appreciate either natural or artificial beauty. They have to be shown.

The majesty in the moonlight on the hills, the glow and tint of the sunset sky, the orchestra of the song birds at day dawn, the enticing shade and quiet of the woodland—a child may grow to full adulthood in the very center of such natural grandeur as all this, and yet scarcely catch a hint of the beauty hidden therein.

Now, here is a scheme for inviting the children to search systematically for the aesthetic fentures of God's great out-of-doors and to make the essence of this refinement a part of themselves.

great out-of-doors and to make the casence of this refinement a part of themselves.

Let us apply the lesson everywhere. We shall be happy if there is a giate committee to help us, and an incentive of prizes, but as parents we may act independently and proceed to show our children point by point the beauties lying about them, in landscape, skyline, woodland and hill crest. We can lead them carefully into the midst of these things, inculcating the sacredness and the human significance of such scenes and situations.

If we exercise patience; if we recognize that the child mind opens rather slowly and painfully to each new fact; if we understand, however, that for the young leagner once to grasp a new and higher meaning of a thing, the lesson is probably leagned for life—then, I say, we shall leagned for life then, I say, we shall leagned for life then to compare the other girls are enjoy.
